Jagran Public School (CBSE)

📁 PROJECTS

Food App API [🔗](#)

- This API allows users to sign up, log in, and explore a variety of delicious meal plans.
- Users can purchase their desired meal plans, leave comments, and provide ratings for the meals they try. While admins can create, update, and delete food meal plans.
- Postman is used for testing APIs, i.e., GET, POST, PUT, and DELETE.
- Technology Stack:
 - Backend: Node.js, Express.js
 - Database: MongoDB
 - Payment Gateway: Stripe API

Real-Time Chat Application

- Developed a chat application enabling users to communicate in real-time across different channels.
- Utilized web sockets for instant message delivery and real-time updates.
- Web Technologies: Html, CSS, JavaScript, NodeJS, Web Socket

GitHub Profile Wrapper [🔗](#)

- Developed using HTML, CSS, JavaScript, and the GitHub API.
- It fetches and displays the user's GitHub profile information, such as repositories, followers, and activity, in an aesthetically pleasing format.
